

About CNSA v2.0

“Certified Network & Security Associate ver2.0” is the most desired curriculum designed to satisfy the need of the huge manpower resource required to install & support the network & security infrastructure for various organizations.

Since we are the leading “System Integrators” and also the business partners of Cisco and Cyberoam, we have been demanded by our customers and other business partners across India to supply the resources with specific skills to support their IT infrastructure effectively. By analyzing the demands and combined the requirements of multiple clients, we have been forced to develop a new course program that suffices the need of our clients. Since, CNSAv2.0 is a product which is incepted by the demand of our esteemed clients and hence has a tremendous amount of job opportunities in the market.

About Grace Technologies

Grace Network Institute is a division of Grace Technologies & Consultants Pvt. Ltd., the most admired name in the IT industry for providing network & security solutions to customers since 2005. Operating from Nagpur, we have added many proud customers like NADT, NTPC, NEERI, Haldiram Foods, Solar Explosives, PIX, Raisoni, PWD, Reliance, and many more.

We provide training for the student aspiring to start their career in this field. Training division was started with the intention of giving in-depth and 100% practical knowledge to the candidates.

Our faculties are not just the tutors, but they are the experts in this field having hands-on practical knowledge of the products. This program should not be looked as a general training program as conducted by others, instead it should be looked as a knowledge & skill transfer sessions between an expert and the beginner.

Interesting Part of our Program

- 100% practical oriented training
- Knowledge sharing sessions from OEM
- Practice on real equipment
- Troubleshoot real-world problems
- Visit customer sites with our team
- Be a part of implementation team
- Complete job assistance for every student
- Mock interview sessions
